

*Your Armor Technology &
Manufacturing Partner*

ARMOR TECHNOLOGY

AMTANK Armor is your turnkey HUB of innovation and integration. Our scientists and PhDs are leaders in the field of armor system integration and the development of lightweight armor materials.

Armor Materials

- Proven material performance to provide multi-hit protection against KE impacts and IED fragmentation
- Cost-effective lightweight armor materials
- Patent-pending technology

Armor System Integration

- Cutting edge systems engineering capabilities
- Simulation and analysis is used to reduce development costs and achieve faster time-to-market
- Facilitates total life cycle support

Blast Defeat Systems

- Integrated protection systems that include a bolt-on solution or permanent integration into the hull of the vehicle
- Mine protection solutions are adapted for specific vehicle systems
- Validated systems are in use today

Benefits of Partnering with AMTANK Armor:

- Small business in a labor surplus area
- Validated and fielded technology with proven successes
- Expertise in product development: concept, design and full-scale production
- Advanced material technology to meet unique customer requirements
- Commitment to continuous Research & Development

AMTANK Armor is proud to offer turnkey solutions.

MANUFACTURING

AMTANK Armor is a proven teammate, providing a high-quality manufacturing capability.

- Composite and metallic manufacturing
- Over 550,000 sq. ft. accommodates prototype build to full-scale production
- More than 80 years of combined manufacturing expertise
- First-pass quality armor solutions provider

CORE VALUES

Ethical business behavior

People and their creativity are valued

High quality products and service that create best value for our customers

Commitment to continuous improvement

Manufacturing Priorities: Safety, Quality, & Productivity
